Authorization for this examiner's amendment was given in a telephone interview with Susanne Hopkins on 1 October 2008.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: The closest prior art to the inventions found in claims 36-57 appears to be that found in Bohn et al (US 4,500,451), as cited in the IDS filed 5 July 2005, in Admon et al (US 6,548,306 B1), and in Paltieli et al (US 6,790,625 B1). Bohn et al teach a method of isolating placental protein 13 (PP13) from human placental tissue using methods such as immunoadsorption. Bohn et al further teach that the isolated protein is useful in the production of an antiserum which has diagnostic applications. Admon et al teach the full amino acid and DNA sequences of PP13, as well as PP13 derived peptide fragments, and a recombinant method for production of PP13 to be used in screening and diagnostic methods. Paltieli et al teach a monoclonal antibody capable of binding

PP13 and an immunoassay and kit for measuring the level of PP13 in a biological fluid. However, Bohn et al, Admon et al, and Paltieli et al fail to teach a method wherein a standard PP13 and PP13 isolated from a pregnant woman are used in an assay comprising exposing PP13-responding cells having a membrane to the two sources of PP13. Furthermore, Bohn et al and Admon et al fail to teach a method wherein a change in the permeability of the cell membrane, as compared between that observed in cells exposed to standard PP13 and that observed in cells exposed to PP13 from a pregnant woman, is indicative of the presence of a pregnancy complication in the woman.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

Claims 36-57 are allowed.
